NeverEtch®

The Ultimate in Marble Protection

Marble has become a cultural symbol of tradition and refined taste. Marble countertops are a stunning addition to any kitchen or bathroom, but their surfaces are vulnerable.

The soft, porous nature of marble requires special care, considerable attention and maintenance, making it seem like it's more trouble than it's worth. Beverages, foods, and liquids create unsightly surface stains and etching after just a few seconds of contact.

Maintaining marble surfaces is costly and requires frequent sanding and polishing. Traditional sealers and protectants offer very little in the form of protection.

Looking for a way to protect your marble surfaces from etching and staining?

Look no further than NeverEtch®.

NeverEtch® Marble Protection was developed to provide a durable, long term way to protect marble from staining and etching. NeverEtch® is a UV-cured clear coating that bonds to marble, sealing its porous surface from liquids, foods and contaminants. Available in honed or polished finish.

NeverEtch® is applied by trained and certified applicators who accentuate the beauty of marble.

NeverEtch® provides peace of mind.

Enjoy everyday living without having to worry about life's daily messes and mishaps ruining the look and feel of the stone you love so much.

The NeverEtch® Difference

- 3 Year protection against staining and etching
- Hard, durable UV stable coating
- There is no discernable edge
- Can be repaired and reapplied
- Professionally applied by certified applicators
- Not a clear plastic film that can highlight surface imperfections in the stone
- Resists acids, liquids, food and other materials considered harmful to marble
